SECURE IT ASSET DISPOSAL

Dispose of your devices efficiently with KIG

Knight IT Group's portfolio of highly professional, value-added IT services has increased further to include Secure IT Asset Disposal

Service Includes

· Nationwide packing and collection service
· Security vetted staff
· On and off site data wiping and/or destruction
· Revenue return – including re-marketing and guaranteed pricing
· Comprehensive asset recording
· Data centre and desktop decommissioning
· End of lease re-engineering

A Service with Security at its Core

Security is our primary consideration. Every aspect of the IT Disposal process is highly secure and based on an exacting set of governance principles. The process is certified ISO27001 and all data sanitisation is performed using UK Government approved data sanitisation software. Asset reports are provided as standard.

Unlocks the Value in Retired Business Assets

Although your redundant IT equipment may be of no further use to you, it may still have a value on the secondary market. Choosing a secure disposal route that involves re-marketing of this equipment can release value back into your organisation, often turning the operating cost of secure disposal into a revenue stream.

Making it Easy

One of our core aims is to make the IT Asset Retirement process easy for our customers. A customised approach is taken to each of our clients' needs and specific requirements are fulfilled in a personalised and tailored way.

Beyond Environment Compliance

The IT Disposal process offered by KIG exceeds all UK and European environmental legislative requirements. Current UK Government guidance actually encourages re-use over as the preferred option for responsible WEEE disposal. This helps conserve natural resources and mitigates the need for conventional recycling.

Our IT Disposal Services have a re-furbishment rate of almost 90% of all equipment collected – helping meet corporate environmental responsibilities of going beyond basic environmental compliance.

What Next?

To find out how our Recovery, Disposal and Recycling services can help your organisation contact your KIG Account Manager.
